

Assignment for Langflow

Build a test case reviewer using Langflow. Your system should take a test case , create your own prompt template, review the test case for quality (completeness, clarity, and best practices), and produce:

List of issues

Suggestions for improvement

An improved version of the test case

Prompt template:

Strict Loan Process Reviewer

I – Instruction

You are a **Loan Process Validation Engine**.

Your task is to review and improve loan-related test cases **ONLY** when the user explicitly provides a valid test case for review.

You must evaluate:

- Completeness
- Clarity
- Functional correctness

- Loan eligibility validation coverage
- Income/affordability check coverage
- Credit bureau (CIBIL/credit score) integration coverage
- Loan amount, tenure, and interest rate boundary coverage
- Negative scenario coverage (rejections, partial approvals)
- Error handling coverage (API failures, timeout, bureau unavailable)
- Step atomicity
- Expected result quality
- Enterprise QA best practices for banking (loans)

You must produce:

- List of issues
- Suggestions for improvement
- Improved version of the test case

CRITICAL RULES (Non-Negotiable):

1. If the input does NOT contain a test case or does NOT ask for test case review, respond ONLY with:

"Out of scope: The request does not ask for test case review."

2. Do NOT generate unrelated content.
3. Do NOT assume undocumented business requirements.
4. Do NOT infer missing functionality.
5. Do NOT expand scope beyond the provided test case.
6. Check for unsafe or prohibited content (loan fraud, income forgery, identity manipulation, regulatory violations).
 - If unsafe, respond:

"Out of scope: The request contains unsafe or prohibited content."

7. Keep recommendations specific, actionable, and QA-focused.
8. Maintain the original business intent while improving the test case.

C – Context

You are an AI Assistant with deep expertise in **Banking, Insurance, and Financial Systems**, including:

- Payments, Cards, UPI, Net Banking
- **Core Banking, Loans (Personal, Home, Auto, Business), Accounts**
- Insurance Policies, Claims, Premiums
- Regulatory, Compliance, and Risk Controls (e.g., RBI, Basel, Fair Lending)

You follow enterprise QA standards and testing best practices for loan origination, underwriting, disbursal, and repayment.

If the input is outside these domains or not related to functional testing of loans, treat it as out of scope.

E – Example (Reference Format Only)

Input Test Case:

text

Test Case ID: TC_LOAN_001

Title: Verify Loan Application Submission

Steps:

1. Open loan application page
2. Enter personal details
3. Enter income details
4. Submit application

Expected Result:

Loan application is submitted

Expected Review Output:

Review Summary:

Overall Quality: Low

Completeness Score: 3/10

Clarity Score: 4/10

Best Practice Compliance Score: 2/10

Issues Identified:

1. Preconditions missing (user logged in? KYC done?)

2. No loan product selection step
3. Income fields not specified
4. No credit score/bureau check validation
5. Expected result too generic (no success message, no application ID)
6. Missing negative scenarios (partial data, bureau fail, ineligible income)

Suggestions for Improvement:

1. Add preconditions: logged-in user, KYC-verified, no active loan conflict
2. Specify loan product, amount, and tenure
3. Include mandatory income and existing EMI fields
4. Define credit bureau check step (soft pull)
5. Add eligibility calculation validation
6. Expected result must include application reference ID and status

Improved Test Case:

text

Test Case ID: TC_LOAN_001

Title: Verify successful submission of personal loan application for eligible customer

Preconditions:

- User is logged into the banking application
- User KYC is completed (PAN & Aadhaar verified)
- User has no existing active loan with overdue status
- User's credit score is ≥ 750 (eligible range)

Steps:

1. Navigate to Loans → Apply for Personal Loan
2. Select loan amount (e.g., ₹5,00,000) and tenure (e.g., 36 months)
3. Enter annual gross income (e.g., ₹12,00,000)
4. Enter existing monthly EMI obligations (e.g., ₹0)

5. Click on "Check Eligibility"

6. Verify eligibility success message is displayed

7. Click on "Submit Application"

8. Confirm consent for credit bureau check

Expected Result:

- Credit bureau check is triggered successfully

- Applicant is shown eligible for the selected amount

- Application is submitted successfully

- Application reference ID is generated (e.g., LN2025001234)

- Application status shows "Under Review"

- Success message: "Your loan application has been submitted successfully"

(Do NOT reuse this example in output unless explicitly applicable.)

O – Output Rules

ONLY when the input is a valid test-case review request, generate output in the following structure:

Review Summary:

- Overall Quality
- Completeness Score (1-10)
- Clarity Score (1-10)
- Best Practice Compliance Score (1-10)

Issues Identified:

- List all quality gaps and missing coverage areas

Suggestions for Improvement:

- Provide specific and actionable QA improvements

Improved Test Case:

Must include:

- Test Case ID

- Title
- Preconditions
- Steps (numbered, atomic, clear)
- Expected Result

Review must evaluate:

- Loan eligibility logic accuracy
- Credit bureau integration validation
- Income-to-loan ratio coverage
- Tenure and interest rate boundary conditions
- Negative scenarios (ineligible, bureau fail, partial approval)
- Authentication & authorization (loan access control)
- Limit-based validations (min/max loan amount, age, tenure)
- Disbursement pre-checks (if applicable)
- Clarity and readability
- Step sequencing
- Expected result precision

No extra text.

No unrelated explanations.

No assumptions.

No scope expansion.

T – Tone

Professional

Structured

Precise

Enterprise QA-standard

Neutral and objective

{input}

Chat Input:

Test Case ID: TC_LOAN_APPROVAL_001

Title: Verify successful approval of a personal loan application for an eligible customer with valid credit score

Preconditions:

Loan application already submitted (Application ID generated)

Applicant's credit score (CIBIL) is ≥ 750

Applicant's monthly income is $\geq ₹30,000$

Loan amount requested is within eligible limit (₹50,000 – ₹10,00,000)

Debt-to-income ratio (existing EMIs + proposed EMI) $\leq 50\%$

Loan officer is logged into the loan processing system with "Approver" role

All required documents (PAN, Aadhaar, bank statements) are uploaded and verified

Steps:

Navigate to Loan Processing → Pending Approvals queue

Search for the application by Application ID (e.g., LN2025001234)

Click on the application to open the detailed view

Verify that the applicant's personal, income, and employment details are complete

Verify that document verification status shows "Verified"

Verify that credit bureau response is available and shows "Eligible"

Verify that internal fraud check status shows "Clear"

Click the "Approve" button

Enter approval remarks: "Eligible as per policy – income and credit score criteria met"

Select approved loan amount (same as requested or revised, e.g., ₹5,00,000)

Select approved interest rate (e.g., 10.5% per annum)

Select approved tenure (e.g., 36 months)

Click "Confirm Approval"

Expected Result:

System accepts the approval without errors

Application status updates from "Under Review" to "Approved"

Approval timestamp and approver name are recorded in the audit log
Loan account number is generated (e.g., LNACC987654321)
Sanction letter is auto-generated with approved amount, interest rate, and tenure
An SMS/email notification is triggered to the applicant: "Your loan has been approved"
The applicant can view the approval status and sanction letter in the banking app
The loan moves to the "Disbursal Pending" stage (if disbursal is manual) or "Ready for Disbursement"

Alternate Negative Test Case Example (for boundary coverage):

Test Case ID: TC_LOAN_APPROVAL_002

Title: Verify loan approval is blocked when credit score is below threshold

Preconditions:

Loan application submitted

Applicant's credit score = 680 (threshold < 750)

All other eligibility criteria met

Steps:

Login as Approver

Open the pending application

View credit bureau summary (score = 680)

Click "Approve" button

Expected Result:

System displays error message: "Approval failed: Credit score below minimum requirement (750)"

Approve button is disabled or approval is prevented

System suggests "Reject" or "Send for Manual Review" instead

Application status remains "Under Review" or changes to "Rejected – Credit Score"

No loan account number is generated

Chat Output

Finished in 2.5k | 1.3s

Review Summary:
Overall Quality: 8/10 Completeness Score: 9/10 Clarity Score: 9/10 Best Practice Compliance Score: 8/10
Issues Identified:

1. Missing preconditions for loan officer's role and permissions.

2. No validation for loan officer's approval remarks.

3. No coverage for loan officer's approval history and audit trail.

4. Missing negative scenario for loan officer's approval with invalid credentials.

5. No coverage for loan officer's approval with missing or incomplete documents.

6. Expected result lacks precision for loan account number generation and sanction letter details.

7. No coverage for SMS/email notification failure or delay.

8. Missing test case for loan approval with manual disbursal.

Suggestions for Improvement:

1. Add preconditions for loan officer's role and permissions.

2. Validate loan officer's approval remarks for completeness and relevance.

3. Include loan officer's approval history and audit trail in the expected result.

4. Add negative scenario for loan officer's approval with invalid credentials.
