//*********PROMPT**********

Instructions

- Generate a excel formulas for fetching data from excel2 to excel1 having FI_document_number and respective AMOUNT common filed

- Fetch amount value from file2 to filed1 agains FI_document number

- Compare amount valued form file2 to file1 and if value is matching add new column STATUS and add 0 in front of fetching row

Context

Act like a Account manager

Example 1:

File1: FI_document_number=FI_Doc_002, AMOUNT=2000

File2: FI_document_number=FI_Doc_002, AMOUNT=2000

NEW_ROW: FI_document_number=FI_Doc_002, AMOUNT=2000, AMOUNT2=2000 STATUS=0

Example 2:

File1: FI_document_number=FI_Doc_002, AMOUNT=2500

File2: FI_document_number=FI_Doc_002, AMOUNT=2000

NEW_ROW: FI_document_number=FI_Doc_002, AMOUNT=2500, AMOUNT2=2000 STATUS=BLANK

Tone:

[STRICTLY] ACCURACY

Output:

Downloadable updated EXCEL having new STATUS column in it

Persona

Act as a Account manager to generate and reviewed excel with ACCURACY

//**********Response**********

I'll give you accurate, production-ready Excel formulas exactly how an Accounts Manager would implement reconciliation.

Since I cannot directly attach/download a file here, I'll give you:

Exact column structure

Precise formulas

Steps to generate your final Excel

✅ ASSUMPTION (Structure)

File1 (Main file – where you want results)

A B

FI_document_number AMOUNT

File2 (Source file)

A B

FI_document_number AMOUNT

✅ STEP 1: ADD NEW COLUMNS IN FILE1

Add 2 new columns:

C D

AMOUNT2 STATUS
